SUBJECT INDEX

Advanced TV compatible thermal imaging using the SPRITE detector, 216
Aerial roof thermography, comparing the effectiveness of ground versus, 177
Aerial survey of building heat loss, quantitative, 187
Analytical interpretation of thermograms including digital processing techniques, 230
Auditing and retrofit quality control: results from total surveys in three major Swedish cities, practical method for applying building diagnostic techniques to high volume urban energy, 150

Budgeting, use of infrared thermography in roof maintenance, 174
Building applications, description of a facility for evaluating infrared imaging systems for, 246
Building diagnostic techniques to high volume urban energy auditing and retrofit quality control: Results from total surveys in three major Swedish cities, practical method for applying, 150
Building heat loss, quantitative aerial survey of, 187
Buildings, implications of thermographic standards on the inspection of, 118

Characterization of composites, thermography—applications to the manufacture and nondestructive, 98
Commercial infrared sensing—an update, professionalism in, 32

Community Energy Management (CEM) in Michigan, 123
Comparing the effectiveness of ground versus aerial roof thermography, 177
Composites, thermography—applications to the manufacture and nondestructive characterization of, 98
Computer analysis, incorporating geometric and radiative effects into infrared scanning, 211
Conservation service program (RCS), thermographic inspections and the residential, 129
Continuous flow wind tunnels, use of infrared imagery in, 203

Description of a facility for evaluating infrared imaging systems for building applications, 246
Design analysis of rotating machinery using infrared thermography, 250
Detector, advanced TV compatible thermal imaging using the SPRITE, 216
Development of economic techniques for residential thermography, 145
Diagnostic techniques to high volume urban energy auditing and retrofit quality control: results from total surveys in three Major Swedish cities, practical method for applying building, 150
Diagnostic tool for locating wet insulation in built-up roofing systems, thermography—a, 164
Digital processing techniques, analytical interpretation of thermograms including, 230

Economic techniques for residential thermography, development of, 145
Electrical maintenance, infrared scanning for, 67
Energy auditing and retrofit quality control: results from total surveys in three major Swedish cities, practical method for applying building diagnostic techniques to high volume urban, 150
Energy Management (CEM) in Michigan, Community, 123
Equipment, infrared thermal imaging of refinery, 47

Generator stator core lamination repairs using thermographic techniques, monitoring of, 38
Glass industry, glass temperature measurement for the, 105
Glass temperature measurement for the glass industry, 105
Ground versus aerial roof thermography, comparing the effectiveness of, 177

Heat loss, quantitative aerial survey of building, 187

Imagery in continuous flow wind tunnels, use of infrared, 203
Images of infrared thermal imaging viewers, recording the, 137
Imaging of refinery equipment, infrared thermal, 47
Imaging systems for building applications, description of a facility for evaluating infrared, 246
Imaging systems, new developments in thermal, 240
Imaging viewers, recording the images of infrared thermal, 137
Implications of thermographic standards on the inspection of buildings, 118
Incinerators, quantitative analysis of sludge, 108
Incorporating geometric and radiative effects into infrared scanning computer analysis, 211
Industrial applications of thermal sensing, overview of, 18
Industrial predictive maintenance, thermographic aspects of, 55
Infrared imagery in continuous flow wind tunnels, use of, 203
Infrared imaging systems for building applications, description of a facility for evaluating infrared, 246
Infrared instrumentation, what's out there: state-of-the-art survey of thermal, 10
Infrared scanning computer analysis, incorporating geometric and radiative effects into, 211
Infrared scanning for electrical maintenance, 67
Infrared sensing—an update, professionalism in commercial, 32
Infrared surveillance: a case study, steel mill, 85
Infrared thermal imaging of refinery equipment, 47
Infared thermal imaging viewers, recording the images of, 137
Infrared thermography, design analysis of rotating machinery using, 250
Infrared thermography, limitations of, 196
Infrared thermography in roof maintenance budgeting use of, 174
Infrared thermography, temperature measurement on semi-permanent mold surfaces using, 89
Inspection of buildings, implications of thermographic standards on the, 118
Inspection of mechanical systems, thermographic, 60
Inspections and the residential conservation service program (RCS), thermographic, 129
Insulation in built-up roofing systems, thermography—a diagnostic tool for locating wet, 164
Insulation in recently constructed roofs, locating wet cellular plastic, 168

Lamination repairs using thermographic techniques, monitoring of generator stator core, 38
Limitation of infrared thermography, 196
Locating wet cellular plastic insulation in recently constructed roofs, 168
Locating wet insulation in built-up roofing systems, thermography—a diagnostic tool for, 164

Maintenance, infrared scanning for electrical, 67
Maintenance program for a pelletizing mill, use of thermography to establish a , 82
Maintenance, thermographic aspects of industrial predictive, 55
Management (CEM) in Michigan, Community Energy, 123
Manufacture and nondestructive characterization of composites, thermography—applications to the, 98
Mechanical systems, thermographic inspection of, 60
Michigan, Community Energy Management (CEM) in, 123
Mill infrared surveillance: a case study, steel, 85
Mill, use of thermography to establish a maintenance program for a pelletizing, 82
Moisture surveys: current state of the technology, roof, 24
Mold surfaces using infrared thermography, temperature measurements on semi-permanent, 89
Monitoring of generator stator core lamination repairs using thermographic techniques, 38

New developments in thermal imaging systems, 240
Nondestructive characterization of composites, thermography—applications to the manufacture and, 98
Nondestructive roof surveyors, professional organization for, 158

Overview of industrial applications of thermal sensing, 18

Practical method for applying building diagnostic techniques to high volume urban energy auditing and retrofit quality control: Results from total surveys in three major Swedish cities, 150
Practical thermal measurement techniques, 72
Predictive maintenance, thermographic aspects of industrial, 55
Professional organization of nondestructive roof surveyors, 158
Professionalism in commercial infrared sensing—an update, 32

Quantitative aerial survey of building heat loss, 187
Quantitative analysis of sludge incinerators, 108

Radiative effects into infrared scanning computer analysis, incorporating geometric and, 211
Recording the images of infrared thermal imaging viewers, 137
Refinery equipment, infrared thermal imaging of, 47
Residential conservation service program (RCS), thermographic inspections and the, 129
Residential thermography, development of economic techniques for, 145
Roof maintenance budgeting, use of infrared thermography in, 174
Roof moisture surveys: current state of the technology, 24

Roof surveyors, professional organization for nondestructive, 158
Roof thermography, comparing the effectiveness of ground versus aerial, 177
Roofing systems, thermography—a diagnostic tool for locating wet insulation in built-up, 164
Roofs, locating wet cellular plastic insulation in recently constructed, 168
Rotating machinery using infrared thermography, design analysis of, 250

Scanning computer analysis, incorporating geometric and radiative effects into infrared, 211
Scanning for electrical maintenance, infrared, 67
Semi-permanent model surfaces using infrared thermography, temperature measurements on, 89
Sensing, overview of industrial applications of thermal, 18
Sensing—an update, professionalism in commercial infrared, 32
Science behind thermography, 2
Sludge incinerators, quantitative analysis of, 108
SPRITE detector, advanced TV compatible thermal imaging using the, 216
Standards on the inspection of buildings, implications of thermographic, 118
State-of-the-art survey of thermal infrared instrumentation, what's out there:, 10
Stator core lamination repairs using thermographic techniques, monitoring of generator, 38
Steel mill infrared surveillance: a case study, 85
Surfaces using infrared thermography, temperature measurements on semi-permanent mold, 89
Surveillance: a case study, steel mill infrared, 85
Survey of building heat loss, quantitative aerial, 187
Surveyors, professional organization for nondestructive roof, 158
Surveys: current state of the technology, roof moisture, 24

Temperature measurement for the glass industry, glass, 105
Temperature measurements on semi-permanent mold surfaces using infrared thermography, 89
Thermal imaging of refinery equipment, infrared, 47
Thermal imaging systems, new developments in, 240
Thermal imaging viewers, recording the images of infrared, 137
Thermal infrared instrumentation, what's out there: state-of-the-art survey of, 10
Thermal measurement techniques, practical, 72
Thermal sensing, overview of industrial applications of, 18
Thermograms including digital processing techniques, analytical interpretation of, 230
Thermographic aspects of industrial predictive maintenance, 55
Thermographic inspection of mechanical systems, 60
Thermographic inspections and the residential conservation service program (RCS), 129
Thermographic standards on the inspection of buildings, implications of, 118
Thermographic techniques, monitoring of generator stator core lamination repairs using, 38
Thermography—applications to the manufacture and nondestructive characterization of composites, 98
Thermography, comparing the effectiveness of ground versus aerial roof, 177
Thermography, design analysis of rotating machinery using infrared, 250
Thermography, development of economic techniques for residential, 145
Thermography—a diagnostic tool for locating wet insulation in built-up roofing systems, 164
Thermography to establish a maintenance program for a pelletizing mill, use of, 82
Thermography in house doctoring, year-round use of, 133
Thermography, limitations of infrared, 196
Thermography in roof maintenance budgeting, use of infrared, 174
Thermography, science behind, 2
Thermography, temperature measurements on semi-permanent mold surfaces using infrared, 89
TV compatible thermal imaging using the SPRITE detector, advanced, 216

Urban energy auditing and retrofit quality control: results from total surveys in three major Swedish cities, practical method for applying building diagnostic techniques to high volume, 150
Use of infrared imagery in continuous flow wind tunnels, 203
Use of infrared thermography in roof maintenance budgeting, 174
Use of thermography to establish a maintenance program for a pelletizing mill, 82

Viewers, recording the images of infrared thermal imaging, 137

Wet cellular plastic insulation in recently constructed roofs, locating, 168
Wet insulation in built-up roofing systems thermography—a diagnostic tool for locating, 164
What's out there: state-of-the-art survey of thermal infrared instrumentation, 10
Wind tunnels, use of infrared imagery in continuous flow, 203

Year-round use of thermography in house doctoring, 133
